

Technical Data Sheet

Butyl glycolate

ITEMS	STANDARD
Appearance	Colorless transparent liquid
Purity(GC)	99.02%
Butyl alcohol%max	0.46
Sulphate(SO4)max	No Detect
Impurity%max	0.28

Package:

200kg/barrel

Product applications

It is mainly used as a leveling agent in nitrocellulose paint and metallic paint to improve the fluidity of paint. Used as anti-whitening agent in cellulose acetate and alkyd resin coatings, suitable for high relative humidity environments. Used as an anti-wrinkle agent in alkyd resin paints. Can also be used in inks and vinyl acetate emulsions. It is also an intermediate of the anticancer drug isohalpine.

Storage

It should be stored sealed and placed in a cool place to prevent rain and sunlight exposure.

The storage period of this product is one and a half years, and it can still be used after passing the re-inspection.
